How to Connect to the Greenbrier Schools Staff VPN

Depending on the device you are using you will need to use the AnyConnect Software that goes with that device.

Apple iOS Devices:
 https://apps.apple.com/us/app/cisco-anyconnect/id1135064690

Android Devices:
https://play.google.com/store/apps/details?id=com.cisco.anyconnect.vpn.android.avf

If you are using a computer you can download the software from the connection website here:
https://greenbrier.vpn.k12.ar.us/
If using a school owned device Technology will need to install the software.

When asked to configure the settings for the connection you will use the following data.

Server: https://greenbrier.vpn.k12.ar.us
Username: *This is your normal school username*
Password: *This is your main password for the computer and email*

After you have configured and connected you will be able to access school resources as if you were on campus.
